

# BioScanMSA™

The BioScanMSA™ Ivory software was designed by IHT in collaboration with Dr. Dawn Ewing, Ph.D., RDH, L-EMT-P, CCT, CTN. BioScanMSA™ provides a perspective on the state of your body's energetic health.

If you've ever wanted to get a peek at what's going on inside your body, this is your chance!

*"Dr. Reinhard Voll taught, 80% of people's problems stemmed from the mouth. IHT is now offering the only dental-friendly program on the market to assist you in testing teeth. I can't practice without my IHT BioScan™!!!"*

- Dr. Dawn Ewing, Ph.D., RDH, L-EMT-P,  
CCT, CTN

# How Does the BioScanMSA™ Ivory work?

The BioScanMSA™ Ivory allows the technician to perform a comprehensive scan of each tooth to determine if it is balanced. Out of balanced teeth are then further scanned to determine meridian relationships to the tooth pain. Careful analysis of the results by the dentist will allow the dentist to determine the best course of action for patient wellness.

When the meridians of the teeth are affected, the patient may experience symptoms such as pain, illness, or chronic disease. The BioScanMSA™ Ivory data provides your dentist with the feedback which can be used to create a customized protocol to help improve the health of the patient.

Unlike other bioenergetic testing devices, the BioScan™ System is an FDA Cleared non-invasive and pain-free method to gather essential data from your body.

The BioScan™ does not diagnose, treat, or cure any disease.

## Who cannot be scanned?

In an overabundance of caution, the BioScan™ will not be used on pregnant women or on any person with any electrical device implanted in the body.

Did you know that tooth pain isn't always the tooth? It could also be related to...

- Stomach
- Large Intestine
- Small Intestine
- Kidney
- Liver
- Spleen
- Heart
- Sinuses
- Pancreas
- Bladder
- Gallbladder
- Joints
- Peripheral Nerves
- Lung
- Vertebral Segments

# How is the Ivory Scan performed?

The BioScanMSA™ Ivory Scan is a non-invasive screening that can be performed by a technician in your dental office!

## The Procedure:

The technician charts the patient's teeth using the BioScanMSA™ Ivory software based on a current panorex x-ray. Once complete, the patient holds a small brass HandMass in one hand while touching the tooth being tested. The technician uses a stylus to take a reading on acupuncture points on the hand. The unbalanced teeth are then tested to determine if the tooth is the problem or if it is a systemic issue.

## Report Findings

The data gathered by the BioScanMSA™ Ivory Scan is plotted on a colorful and easy to read one-page report. The dentist analyzes this data, and an action plan is created.

Unsure if tooth pain is from the tooth?  
**We Have Solutions!**

Gain valuable information about the true cause of tooth pain with a comprehensive BioScanMSA™ Ivory Scan
