

Joyce Baker BSN, DiHT

Case Studies

Joyce Baker, BSN, DiHT, founder and Chief Executive Officer the Worthington Wellness Center, Inc. in Worthington, Ohio, graduated in 1973 with a Bachelor of Science in Nursing from Union College in Lincoln, Nebraska and completed a two-year Diplomat in Homeotherapeutics from the Institute of Natural Health Sciences in Livonia, Michigan. She specializes in Computerized Electro Dermal Screening, Homeopathy, Complementary Nutrition, Herbal Medicine, and Phenolic Therapy. In addition to lecturing both at home and abroad, Joyce taught accredited courses in Basic and Advanced Homeopathic Principles at Columbus State Community College in Columbus, Ohio. In 1993, she was chosen honoree for the International Who's Who of Professional and Business Women.

In 1990, she began the journey of becoming a natural health care consultant and CEDS practitioner. The CEDS field was still in its infancy in the early 1990's, and Joyce learned the basics of CEDS from the few experienced practitioners in those early years, piecing bits of information from here and there to form her own CEDS practice. She firmly and devotedly believes that CEDS should be used with almost every health care modality.

Introduction

I am very grateful to share with you my experiences using this technology. MSA changed my life to the point I knew I had to change my career path, which I did and have never looked back!! I have been testing for 27 years, at about 40 appointments a week and have seen many amazing cases resolve/ improve!

Here are my cases that have been remarkable to be involved in:

CASE 1.

- 11 months old, born 5/14/2016, female
- Diagnosed by MD's with developmental delay (unknown origin), chronic ear infections, and viral congestion
- Was non-verbal, poor eye contact, could BARELY army crawl, no weight bearing on legs
- Non-smiling, very little play activity
- Poor sleep and crying almost constantly
- Questionable food allergies
- Only nursing, no solid food

First MSA testing - 4/12/17 (Hair testing) Balanced For:

- Excess testosterone
- Viral bronchitis, RSV
- Vax Reaction to Pertussinuno
- Food allergies to milk and eggs, adrenal fatigue, Low DHEA = leaky gut
- Silver need (B-cells)
- Argimony (Bach flower) = Arnica type, blue eyes, "I'm fine"; Arnica types tend to heal quickly
- Anterior pituitary weak, decreased growth hormone
- Stressed but no panic

Nutritional Support for Adrenal Function

.... **Compensation stage (adrenal hyperfunction).** In this stage of adaptation to chronic stress, sustained activation of the sympathetic nervous system stimulates ACTH release from the pituitary. The adrenal glands respond to ACTH by producing persistently elevated blood cortisol levels. To compensate, the hypothalamus-pituitary become less sensitive to cortisol feedback inhibition. With elevated cortisol levels, glucose utilization declines (insulin resistance increases), gluconeogenesis in the liver increases, and blood sugar rises. Increased degradation of muscle protein supplies amino acids for gluconeogenesis.

In addition, blood lipids rise (hyperlipidemia) and abdominal fat tends to accumulate. In some individuals, symptoms resemble syndrome X, with tendencies towards insulin resistance, hypertension, mild obesity, and elevated serum cholesterol and triglycerides. High cortisol and low DHEA suppress the immune system. Production of secretory IgA, the major immune barrier of mucous membranes, declines. The gut lining becomes thinner, increasing gut permeability to toxins and antigens. Glucocorticoid-include immunosuppression sets the stage for all allergic responses, yeast overgrowth, and chronic infections.

Fatigue stage (adrenal hypofunction). The body's ability to synthesize cortisol and other corticosteroid hormones may eventually decline, ultimately leading to adrenal exhaustion. Excessive fatigue, reduced ability to concentrate, alcohol intolerance, headache, menstrual irregularities, low blood pressure, reactive hypoglycemia, and carbohydrate sensitivity may follow. With too little cortisol available to curtail inflammation, proinflammatory eicosanoids and proinflammatory cytokines are unregulated. In addition acute stress amplifies liver detoxication enzymes and oxidative stress. This maladaptation stage promotes chronic inflammation, tissue damage, and degenerative diseases.....¹

Gave Her: (all dilutions)

- Mucolytic Drainage Drops - with signals for RSV, Pertussis, Vax Reaction Drops, agrimony, anterior pituitary, DHEA, stress, adrenal. Gave at 10 drops every 30 mins on the 1st day; 2nd day - 10 drops hourly, 3rd day - 10 drops
- 4 times a day.
- Smart silver (Deseret Biologicals) at 1/2 tsp BID
- Told mom (nursing) to avoid milk and eggs

Second MSA testing 5/4/17

Progress:

- Sleeping much better during the day
- More alert, more focused
- Right arm moving much better, but still weak
- Eating some small amounts of solid food
- Much less congested with only one mild viral episode
- Still army crawling, but less cranky

Balanced For:

- Inflammation
- Constipation
- Heavy metal (lead, aluminum and copper on the NE point; body heals in layers)
- Weak spleen (B-cells)
- MSM (sulfur), must have sulfur to make metallothioneine; Phase II in liver not working. Allows metals to collect in fatty tissues/organs
- Brain sarcode
- Weak adrenals
- Lack of cellular potassium
- Bufo homeopathic for "dull intellect"
- DHEA 6x

Gave Her:

- MSM - 1/2 cap - BID
- Potassium oligo @ 10 drops TID with the signals in it for her: Inflammation, teething, constipation, metox, muscle relaxant, spleen, color yellow (spleen), adrenal drops, Bufo - homeopathic, brain sarcodes, DHEA 6x
- Smart Silver, 1/2 tsp, BID

Third MSA Visit 6/01/2017

Progress:

- Holding books now
- Pointed to nose
- Sleeping much better, awake only 1-3 hours a night, was 5-6 hours!!
- Smiling more
- Doing "Hi-5's"
- Arching back less, but right side still weaker than left
- Doing OT and PT; they are amazed at progress
- Still army crawling though
- No viral activity

Balanced For:

- Adrenal support
- Constipation Drops; lack of magnesium
- Metox: lead, aluminum, copper
- Excess lung chi - metal sedate (going to be perfectionist and neat/orderly)
- Learning Disability Drops
- Chamomille
- Bufo homeopathic

Gave her:

- Magnesium lactate - one BID
- Continued Smart Silver - 1/2 tsp BID
- Anti-stress Drops with signals for adrenal, teething, metox, learning, Bufo, metal sedate
- Mucolytic Drainage with all viruses, bacterial, and sinus signals
- Continuing MSM at 1/2 capsule BID

Fourth MSA visit 6/29/2017

Fourth MSA visit 6/29/2017

Progress:

- Rolling over well
- Good eye contact
- More verbal cooing and other sounds
- Eating more and more solid foods
- Still cannot hold a cup or a bottle
- One slight cold again, but much less often than before
- Still army crawling; sitting up on own now!

Balanced For:

- Food allergy to gluten only
- Kidney meridian blocked (AM-11)
- DNA for the nervous system/brain
- Heavy metal (copper)
- DHEA
- Weak anterior pituitary
- Low potassium, low magnesium
- Weak adrenals; need for more silver

Gave Her:

- Potassium oligo - 10 drops TID
- Neurotrophin PMG (DNA for Brain, need to bring back its memory) - take 1 BID
- Increased Smart Silver to 1/2 oz per day
- Magnesium lactate one BID
- Finishing Anti-Stress Drops with signals for metox, kidney meridian, anterior pituitary, adrenal, DHEA 6x
- Avoiding gluten (Mom too)

Fifth MSA visit 7/20/2017

Progress:

- Only two light URI's since April 2017. Huge change!!
- Sitting up now on own consistently
- Motor skills improved
- Actually started crawling on all fours in last few days!
- Making more sounds; no actual words yet though
- Smiling much more

Fifth MSA visit 7/20/2017

Balanced For:

- Cerebrum Compositum
- Teething Drops
- Neurotrophin PMG
- Magnesium, potassium
- Too much copper (30c) (metox on NE point)
- Chamomille
- Motor nerve
- Sympathetic too strong (30c)
- Parasympathetic too weak (3x)

Gave Her:

- Continued Potassium oligo, magnesium, and silver at - 1/2 oz per day
- Finishing MSM - 1 a day (collagen and liver phase II)
- Mucolytic Drainage with signals for cerebrum compositum, teething, cuprum metallicum 30c, chamomile, motor nerve, sympathetic 30c, parasympathetic 3x
- Still getting OT and PT, more and more stability
- Avoiding wheat, oats, barley, rye; no milk or egg signals now

August 1, 2017 update

- Said her first word, "dog"!!
- Waving goodbye often

Sixth MSA visit 8/16/2017

Progress:

- No signs/symptoms of food allergies for weeks
- Sleeping very well
- Making more and more sounds, continues to say "dog"; loves books!
- In last 2 weeks actually pulling herself up to standing positions by tables and chairs!
- Clearly understanding "yes" and "no" and other words.
- Had one more slight cold (total of 3 since April 2017; But was ill constantly until then)
- Still favors left side of body

Balanced For:

- Slight copper signal balancing at 46 (I have found every autistic spectrum child having high copper in the brain)
- Spleen 2x - B cells not active enough; spleen is "mother" of water element (adrenals)
- AM-3 - spleen meridian blocked (and has been; have to follow Herring's Law)
- Teething
- Cranial sacral
- Sacral plexus 4x
- Bufo, Learning Disability Drops
- Motor nerve 6x

Gave Her:

- Increased magnesium lactate to 2/day
- Continues with Neurotrophin PMG
- Continues with Mucolytic Drainage drops with codes for:
 - Metox; Cuprum metallicum 30c
 - Teething drops
 - Cerebrum Compositum
 - Memory drops
 - Sacral plexus 6x
 - Bufo
 - Adrenal tonic
 - Fuchsina magenta (purple/magenta color)
 - mom to get cranial sacral work and chiropractic care for daughter (right hip seemed "locked")

Case Study #1 – Current Status

Much progress has been made with Kenzii, but it is a case in progress. The body is truly amazing when given some help!!!! Kenzii will probably balance for Folic B12 in the future. She is also having genetic testing done soon.

CASE 2.

Presented on 7-13-2005

- Age 75, female, blue eyes
- Medical diagnosis: Persistent Keratosis
- Skin lesions, itchiness, redness started December 2004; 100 + lesions removed by dermatologist from Dec '04 to May '05
- Cause - unknown

Balanced For:

- Celtic sea salt (low in minerals - not conducting electricity well)
- Human Papilloma Virus, Verucca Virus
- Medorrhinum Miasm
- Zinc
- Thymex

Given:

- Zinc - 100mg per day
- Thymex - 2 BID
- Virus Nosode Drops with signals for HPV, Verucca, Medorrhium miasm at
- 10 drops every 1/2 hour for the 1st day; then 10 drops TID

Visit 2: 8-11-2005

Progress:

- Lesions receding 20%, appearing neck to her knees
- Less redness

Balanced for:

- Anti-wart Drops (Verucca Virus)
- Mycotoxins = Fusarium vasinfectum, Citrinin, Fumonisin, Moniliformin, Acetaldehyde (Phenolic), T-2 Toxin, Fusarium roseum, Fusarium trichiella, Fusarium oxysporum
- 8 different mycotoxins!

Given (All dilutions):

- Mucolytic Drainage Drops with signals for all mycotoxins and Verucca Virus

Visit 3: 11-9-2005

Progress:

- No new Lesions; current ones decreasing in size
- Still itching skin

Balanced For:

- Blood Purifier Drops
- Eczema - HP Drops
- AM-11 (Kidney meridian blocked)
- Mycosis Nosode Drops
- Kidney Liquesence Drops
- Inflammation Drops

Given (All dilutions):

- Two bottles of Kidney Drainage Drops with signals for mold, Kidney AM-11 meridian, Kidney Liquesence
- Herbal di-Retic caps - 5 daily
- Kaprex (Metagenics) for inflammation at 2 - T1D

Visit 4: 1-13-2006

Progress:

- Skin Lesions 75% better!

Balanced For:

- Dermatrophin PMG tabs
- Blood Purifier Drops balancing at 46 now
- Mycological Immune Drops at 47 now; only one fungi signal = Fusaric Acid
- T4 - Thyroxine; Iodine

Given:

- Systemic Detox Drops at 10 TID with signals for Blood purifier, Fusaric Acid
- Dermatrophin PMG at 1 TID
- Prolamine Iodine at 1 daily

Visit 5: 4-26-2006

Progress:

- Skin Lesions 90% improved
- Patchy red, itchy skin 90% improved

Balanced For:

- No fungi or HPV/Verucca signals
- No Kidney or Eczema signals
- No miasms
- Carpal Tunnel (Lack of B6)
- High Blood Pressure (Homocystiene increased) = lack of B6
- Acetylcholine chloride 6x

Given:

- 2 Bottles of Cortico B5/B6 at 1 TID

Update:

- From 7/13/2005 - 2007 she balanced for underactive adrenals, Potassium (B6 needs K+ for absorption)
- Bifidus need; leaky gut on Large Intestine point which resulted in toxic liver (Psoriasis signals)
- Liver Support

Today:

- Skin lesions/Eczema/Psoriasis have never re-appeared.

KEY TIPS FROM:

CEDS SHOULD BE USED WITH ALMOST EVERY HEALTH CARE MODALITY....

If you are determined to continue with this technology, you will impact lives more than you can imagine. This truly involves healing body, mind and spirit.

Herbally yours, Joyce.
